## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, see applicant's REMARKS, filed May 13, 2003, with respect to new claims 6-14 being patentable and unobvious over the teachings of Kumagai, Marsh, Albrecht and Hahn have been fully considered and are persuasive. However the argument with respect to claims 6 and 12 over the teaching of Tripp is not persuasive.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 6 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Tripp et al.

Tripp discloses tantalum powder for capacitor comprising tantalum powder doped with silicon and phosphorous. Tripp teaches that silicon suppresses leakage normally associated with phosphorous doping and also enhances capacitance. See Tripp, col. 1, lines 41-43. Tripp further teaches silicon doping alone can provide enhanced capacitance of the tantalum powder and that it functions as a powerful sinter retardant, col. 5, lines 19-20 and 32-33. The preferred range of silicon in tantalum is 50-1000 ppm and for Si concentration of 500 ppm the capacitance is more than 10,000 CV/gm, see the last two tables in col. 4. Note that applicant's mixture as currently cast does not exclude the presence of P. Even if P is excluded from applicant's mixture, applicant's invention is still anticipated by the teaching of Tripp since Tripp also discloses the doping of Si without P.

***Double Patenting***

4. Claim 13 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 7. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

5. Claims 10-11 are deemed allowable.

6. Claims 7-9 and 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
